STAINLESS STEEL POOL!

The NEW and EXCLUSIVE Extreme Stainless Steel Resin Salt Water Pool is here! After many years of use in the Commercial pool industry the Extreme Stainless Steel pool is now available exclusively from Classic Pools for your ultimate swimming pool.

Classic Pools first introduced the Resin above ground pool to Australia in 2001, now we are proud to release the amazing combination of stainless steel and resin. The coupling of resin and stainless steel mean that you can now have the most technologically advanced modular pool in the world in your own backyard.

The Extreme Stainless Steel Pool Features:

- ✓ The most technologically advanced above ground/ in ground modular pool in the world.
- ✓ Completely engineered for Salt Water.
- ✓ Stainless steel double vinyl laminated wall with long lasting longevity properties and durability.
- ✓ Huge benefits of stainless steel including corrosion resistance, high strength, impact resistance.
- ✓ Contemporary stone 'look a like' wall with matching sandstone coloured copings.
- ✓ Australian Engineers certification for above ground, partially in ground or fully in ground installation.
- ✓ 250mm Curved Injection Moulded Resin Copings.
- ✓ Deep End Option Available on all Shapes and Sizes.
- ✓ Available in Oval, Lap Pool and the exclusive Teardrop shape
- ✓ 30 year limited warranty - conditions apply.

Pool Facts

Injection Moulded Resin is the most expensive form of resin as its the strongest form of resin and the safest. The 250mm wide resin injection moulded resin copings on the Extreme are the widest in Australia. Classic Pools believe its unconscionable to provide low cost plastic copings like other pool companies do. Don't risk it!
